Outline

Okinawa Prefecture will hold a webinar "Okinawa" IT Business Base Connecting Hong Kong and Japan" for those who are interested in doing business in Japan and using Okinawa as a base to advance into the Japanese market.

Okinawa is most famous as a resort destination in Japan, but also has drawn a great deal of attention for its great business environment such as Japanese only special economic zone which offer tax preferential treatment for targeted business and substantial support for strategic industries. Okinawa prefectural government has strongly promoted its IT industry over a decade and established a cloud infrastructure. Okinawa and Hong Kong are seamlessly connected to a submarine cable with high-speed, large volume and low cost which is the most direct route to Tokyo. And we have cloud data centers that are seamlessly connected with respective major bases in Okinawa by high speed optical lines, and we offer a risk dispersion function such as backups to these centers for domestic and overseas data.

We also introduce "ResorTech Okinawa" Initiatives. Tourism and IT are said to be the world's greatest growth industries. By combining these two industries, we will lead the innovative businesses from Okinawa to the world. Please join our seminar. We offer you a wonderful opportunity to realize the merits of Okinawa as your business partner.

Target

- IT companies that utilize the Submarine Cable and Data Center
- Content providers that distribute motion videos
- System Integrator
- Companies based in Hong Kong that are developing (considering) business in Japan
- Companies interested in ResorTech
